

I respectfully request that the FCC carefully consider and reject the National Association of Broadcaster's petition 04-160. The FCC should never put limits on the content of satellite services which are obviously privately funded by its listeners. I personally receive great benefit by the added content available to me over XM Satellite Radio. As a resident of Southern California, having access to local traffic and weather without being subject to the relentless advertising and non-relevant programming is extremely beneficial to me and the thousands of other listeners in this market. The NAB's petition is clearly political because they're afraid of loosing their precious advertising dollars. The FCC should not interfere with freedom of speech rights. I hope you do the right thing. I'm really getting sick and tired of the FCC's fascist tactics at dictating what I hear, particularly when I pay for the service.
